Project Title: Jean-Michel Basquiat Website

Wikipedia: https://en.wikipedia.org/wiki/Jean-Michel_Basquiat

I plan to create a responsive, multi-page website about the artist Jean-Michel Basquiat (1960-1988). The website will explore his life, artistic career, and lasting influence, with a particular focus on his artworks and recurring symbols. The site will include a home page providing an overview of Basquiat and his work, a page exploring his life and legacy, a page featuring selected artworks and their visual themes and symbolism, and a page highlighting exhibitions of his work.

1. Home/ Introduction - Introduce Basquiat with a short summary of his artist career.
    a. Landing page with a big image of his work or him in front of his work
    b. Introduce Basquiat, his artistic style, and the significance of his work.
    c. Smaller sections of other pages
2. Life & Legacy
    a. Explore his early life, rise to prominence, artistic career, death and influence on contemporary art and culture.
3. Selected Works
    a. Show some of his selected works and talk about some of the major symbols seen in his works.
    b. At the bottom, a section with a grid with multiple artworks and people can click on them for more info.
4. Exhibitions
    a. Mostly based off of the exhibition section in the wikipedia. Highlight the 2026 exhibition and put rest in past exhibitions.
5. Sources
    a. Just lists all the sources → wikipedia, image sources, etc.
